Abstract

With a focus on creating true global in-discriminatory economic growth, organizations, entrepreneurs, and investors need a sustainable ecosystem free from the influence of regulatory agencies and malicious third-parties. As companies seek ways to raise capital through ICOs, streamline operations by using blockchains, enhance growth, and increase profitability, they need to determine the advantages of establishing and managing a business in different locations worldwide. Most significant barriers they face are hiring local talent, keeping up with innovation, the increased cost of operating in foreign countries, corporate taxes, and government regulations.

This document highlights the benefits of creating a business-oriented means with Walmart Prime , a subclass of Walmart Prime Investment Corporation, on a decentralized network with Proof of Performance (PoP) incentive mechanism, its governance, management tools and an alignment system built on top of the Walmart Prime 's blockchain. Walmart Prime governance is regulated by a Walmart Prime's Platform, which is designed to be a self-sustainable decentralized ecosystem consisting of businesses motivated to participate and reap the rewards of their success without geographical restrictions or limitations. Initially, the Walmart Prime's Platform will be designed specifically for profit-driven companies but is modular enough to accommodate other types of organizations.

Legal Clause

1.1 Legal Reservations

The information presented in this document may not be exhaustive of the issues raised in it and does not imply elements of establishing any contractual relationship. The only purpose of this paper is to provide relevant information to potential coin holders in order to enable them to determine whether they want to undertake a detailed analysis of the company due to their interest in acquiring the products of Walmart Prime . This White Paper does not constitute the solicitation of an offer to sell nor an offer to purchase securities in any jurisdiction, where such offers or solicitations are unlawful.

Although Walmart Prime is not a security and their owners are not shareholders, in the event that this coin will be classified as a security, it may be subject to certain restrictions imposed especially by US or Canadian securities legislation or securities legislation applicable in several other countries.

{This document and any other published in association with this white paper relate to a potential token offering to contributors (persons) in respect of the intended development and use of the network by various participants. This document does not constitute an offer of securities or a promotion, invitation or solicitation for investment purposes. The terms of the contribution are not therefore intended to be a financial service offering document or a prospectus. The token offering involves and relates to the development and use of experimental software and technologies that may not come to fruition or achieve the objectives specified in the white paper. The purchase of tokens represents a high risk to any contributors. Tokens do not represent equity, shares, units, royalties or rights to capital, profit or income in the network or software or in the entity that issues tokens or any other company or intellectual property associated with the network or any other public or private enterprise, corporation, foundation or other entity in any jurisdiction.

The token is not therefore intended to represent a security interest.}

1.2 Walmart Prime

Walmart-Prime was made by professionals for individuals who want to get involved in cryptocurrency mining. We believe that everyone should benefit from the mining and be able to have access to the newest technologies and large-scale industrial data centers from your laptop or mobile phone.

This White Paper is an information document presenting Walmart Prime plans for the development of Walmart Prime Investments in the future. Walmart Prime reserves the right to change these plans or refrain from implementing them at its sole discretion. The White Paper has not been prepared in accordance with any legal or regulatory acts and is not subject to any legal or regulatory act in any jurisdiction to protect investors.

This document may contain “forward-looking statements” - that is, declarations related to events in the future. These declarations often refer to the future business and organizational plans of Walmart Prime and often include words such as “expect”, “intend”, “plan”, “will”, “would”, “estimate”, “forecast” or “aiming”. These declarations, by nature, relate to issues that are uncertain to a varying extent. Walmart Prime cannot guarantee that any forward-looking declarations, historical data or experiments carried out by the company or the expected results of the Walmart Prime will be associated with actual facts or results in the future. Walmart Prime are not shareholders or any kind of securities. They are only a means that can authorize investors to use it to acquire services provided by Walmart Prime Investment Corporation.

The purchase of the products of Walmart Prime should only be undertaken by persons or entities with significant experience and understanding of the use and complexity of cryptocurrencies and software systems based on blockchain technology. If you do not have the required experience or expertise, you should not acquire these products or participate in this ICO. The participation in an ICO is generally considered to be burdened with such significant risks as loss of funds invested, including cryptocurrency, tax liabilities and other legal sanctions resulting from the law of individual jurisdictions. Before proceeding to these products and offers, carefully read this document. Acting with the due diligence required from a professional, you should carefully consider the risks, costs and other negative aspects if necessary and obtain independent opinions in this matter.

1.3 AML & KYC

Walmart Prime will cooperate with all state authorities as well as with all authorized financial institutions and will strictly adhere to all applicable AML (Anti-Money Laundering) and KYC (Know Your Client) and other banking or governmental laws and regulations.

Walmart Prime products and ICO token complies with these rules and may restrict access for US citizens, Green Card Holders and US residents to the ‘accredited investors’ category, pursuant to Provision D, Rule 506 (5) of the US Security Act. Certain statements, estimations and financial information contained herein are forward-looking statements or for information purposes only. Such statements or information relate to known and unknown risk factors and uncertainties, which may cause actual events or results that differ materially from estimates, implied results or expressed in such projections.

The English version of this White Paper is a basic and official source of information about the Walmart Prime platform. All information contained herein can be always translated into other languages. It can also be used for written or verbal communication with existing or future members of the community, partners etc. Due to translation or transmission of such information, part of the contents of this document may be lost, their integrity may be compromised or the content may be misinterpreted. The accuracy of such alternative ways of exchanging messages cannot be guaranteed. If there are any inconsistencies or contradictions between the translation or communication and this White Paper, the provisions of the original document in English will prevail.

The Idea

Welcome to the Walmart Prime Mining & Investment Space!

Technology improves the world and does it constantly. Our goal is to streamline this irreversible process and mark our role in transforming the civilization. As the Walmart Prime team, we have created an Internet platform for raising capital that will support the commercialization of high end technologies protected by patents. By using a Blockchain-based distributed ledger, we can guarantee the transparency of the investments based on Walmart Prime.

Our idea unites three groups of clients:

*Picture a hemisphere where each enlightened patent-based thoughts can be shared, implemented and made available to consumers. A place where miners in their labs or garages can present their ideas and the community built around the **WalmartPrime** project will vote on which technologies should be financed. Cryptocurrencies can really change the world we live in.*

Maybe we will live to see the day when a cure for cancer, engines consuming the minimum amount of fuel or stellar modules accelerating the flight to Mars, will appear on our platform. From the recent day view, it seems to be irrational, however isn't this 'irrationality' a driving force for productivity and progress?

In the history of humanity, there have always been examples which seemed unfeasible, until the advocates of science discovered uncharted worlds and technologies which could move the barriers of "ridiculousness" to the next level.

Today we know that irrationalism is the basis for science. Paraphrasing Popper's words, "if something is scientific, it is refutable". Walmart Prime is out to disprove stagnant paradigms and form new ones.

Walmart Prime constitutes an idea that will connect an intellectual flower with an affluent and well-thought-out investment process. Although, we start with Bitcoin, our leading idea is to create the incubator of geniuses who will say in many years ahead: Thank You Walmart Prime for It All!

Problems of the World

It is possible that when compared to rare metals, Bitcoin mining is not as wasteful in terms of environmental impact, but it remains clear that there could be better and more efficient uses of crypto-currency mining power than solving arbitrary cryptographic problems.

This belief can be seen in a number of innovative projects announced in recent weeks that seek to use bitcoin's power to do everything from storing genetic material to archiving important data.

This increasingly important question about the future of one bitcoin's core industries arrive at a time industrial mining has already come to replace the network of individual miners that once powered the bitcoin network, and major voices in the industry are beginning to make their views on the matter heard.

Being aware of the global problems in the highend technology world makes the benefit of the Walmart Prime Investment Fund visible. Today there already are small investment markets for bitcoin which is primarily filled by large companies with a small bitcoin segment in their portfolio (other cryptocurrencies). The majority of the potential (and also the risk) lies in those companies focusing primarily on bitcoin.

The Walmart Prime Investment Fund and Walmart Prime bridge this gap with investment transparency through Blockchain and together with the specialists in the industry ensures financial security for the future.

Blockchain also solves the issue of raising private capital. Unlike the institutional capital that can only be used for research, the private investors' money will be used to commercialize technology and thus create profitable future companies.

Walmart Prime solves investors' problems. By choosing the right business partner, we offer a safe investment in the highend technology market, the value of which over several years will exceed the capitalization of hundreds of billions of dollars (the current valuation is about 630 million dollars).

In the next few years, only several dozen companies will remain on the market with the capital reaching Facebook or Google. One of these companies will be Walmart Prime. The Walmart Prime investment platform aims to meet global problems and connect the following groups into a coherent investment fund:

3.1 INVESTORS' PROBLEMS

- lack of space for safe investment in high end technologies
- limited trust to the world of science and new technologies
- a long legislation process from the start of research to commercialization

3.2

MINERS' PROBLEMS:

- a low probability of calculating a hash starting with many zeros.
- labor and gross power intensive.
- lack of technology standardization as well as a consistent quality policy.

3.3 BLOCKCHAIN COMMUNITY PROBLEMS

- a large number of cryptocurrencies that don't give any real benefits
- a small selection of promising projects based on PoW consensus
- lack of Blockchain-based projects with access to a real business

Our Solution:

We at Walmart Prime Offer Solutions on several levels:

4.1 SOLUTION FOR INVESTORS

- The Walmart Prime team are specialists in their industry. Due to our wealth of experience in the field of investments and extensive business contacts, each Walmart Prime technology project receives a guarantee of its usefulness and future profits in business.
- Using Blockchain technology, Walmart Prime will create a friendly place for investors, without the need for long and complicated legal consultations.
- Blockchain is an open ledger. Walmart Prime ensures that the investment capital movement and implementation processes will be verifiable at every stage, e.g. through the client's panel on the website.

4.2 THE SOLUTION FOR MINING

- Creating a website platform (<https://walmart-prime.com>) where miners will be able to submit their ideas. After being verified by the Walmart Prime mining team and taking into consideration the community voting, all prospective projects will be directed to commercialization.
- Walmart Prime offers access to the most experienced lawyers and specialists from, among others, the Kostrzyn Slubice Special Economic Zone, who have invested hundreds of millions of zloty, in companies such as Zalando or BMW. Thanks to their experience and trust of our investors, we will accelerate the process of the project implementation.
- Through the creation of a transparent system of capital movement based on Walmart Prime's Blockchain and using Walmart Prime's products, we will provide our investors with the most promising project.

4.3 SOLUTION FOR THE COMMUNITY

- The biggest advantage of Walmart Prime is the possibility of active support from the companies producing real products (e.g. Gold).
- Seminar and enlightenment programs on mining as regards to cryptocurrencies or crypto-assets collection.
- Blockchain is a community. We are close to the idea of Satoshi Nakamoto, which is a distributed ledger. Therefore, PoW is not only a bow towards miners but also towards a fair distribution.
- Walmart Prime is one of the few collectors of crypto-assets based on PoW, behind which there is a viable business (planned implementation of mining factories and development of Crypto-related technologies in the future).

4.4 HOW WILL IT WORK OUT?

The way the Walmart Prime Investment Fund works is as follows:

- By mining with us, investors give us funds for technological projects prepared to be commercialized.
- Voting is done via portfolios and the selected project receives funds for implementation.
- Walmart Prime establishes a special purpose vehicle with a selected project and commercializes this project, after the investment is realized, Walmart Prime's investors receive lifetime profits of the promoted project.

- Walmart Prime is committed to periodically purchase crypto-assets from the international market allocating the 250%-75% of its profits (if any).

(A detailed description of the investment process can be found in on <https://walmart-prime.com>: Walmart Prime Legal Status.)

The Design of WALMART PRIME

5.1 STRATEGIES OF GROWING ASSETS

Proper combination of stocks – mining, investment, trading and exchange allowed our portfolio to grow without much risks and volatility than a portfolio that is solely dependent on just mining or either of the above mentioned means here in [Walmart Prime](#)

Diversification works partly because when one asset class is performing poorly, another is simultaneously being progressive.

GROWTH TRACK - 2019

5.1.1 Our Concept of Trade (with regards to MINING)

Arbitrage Modulus :

Arbitrage defines the process of taking advantage of fluctuations and inefficiencies in markets or a nearly simultaneous purchase and sale of securities or foreign exchange in different markets in order to profit from price discrepancies. This also defines the purchase of the stock of a takeover target especially with a view to selling it profitably to the raider

As regards to cryptocurrencies, this can occur as the price of assets fluctuates over time. If there is a difference between the price of an asset across exchanges (or even potentially within the same exchange), it may be possible to buy and sell the same asset in a way which will result in a net profit.

The arbitrage opportunity for any market is calculated by identifying the overlap between the highest bid prices and the lowest ask prices. When the bid price on one exchange is higher than the ask price on another exchange for a cryptocurrency, this is termed an “arbitrage opportunity”

Our Offer & Products

6.1 What We Have to Offer

We believe in the world of sharing economy and decentralization, thus we have envisioned and created next-generation tools and platforms for cryptocurrency miners and traders. We specialize in hosting high-density computer hardware requiring substantial access to both power and cooling.

With regular payouts, great customer support, high-end security, system stability and by delivering massive amounts of hashing power, Walmart Prime has rapidly developed into a well-known establishment among cryptocurrency miners as big as Bitmain. We, also serve as a backbone network and it plays an important role in the cryptocurrency ecosystem as regards to the mining hemisphere by indirectly providing new coin creation (ICO) and transaction validation on several different blockchains.

Here at Walmart Prime, we offer participation in the Crypto-assets investment program, which through the release, purchase and mining of cryptocurrencies built on a higher hash algorithm and based on Bitcoin, enables investing into the development of high-end patent-based technologies and then their commercialization. We as well, provide turnkey renting solutions from the largest cryptocurrency mining data centers. Thus, we also Provide:

- Immersion and Air Cooling Technology
- The Newest ASIC Chips
- Ultimate Performance at Optimized Cost
- Official Sale and Re-sale of Industry Leading Companies
- Securities
- Optimum Overall Network Hashrate

CLOUD-MINING CONTRACTS

Security & Risks

In the world of cryptocurrencies our priority is to secure all investors and users of the Walmart Prime network. Therefore, we have established Walmart Prime (Corp.). The Company has signed a cooperation agreement with the Ireland Academy of Sciences and Institute of Low Temperature and Structure Research in Dublin, which enabled the release of cryptocurrency-based patents. The Ministry of Science gave us permission to commercialize Irish patents. Our team consists of AI-Integrated mining bot with techniques known in the industry and has proved itself at the largest cryptorelated conferences.

7.1 TECHNOLOGICAL RISKS

Hackers and other groups or organizations may try to attack a User's wallet or Website or launch unrestricted "DoS", "Sybil", "spoofing" attacks using malware (malware) or "consensus-based" attacks. ". Walmart Prime Investment Corporation cannot exclude that Walmart Prime may unintentionally contain weaknesses or defects in the source code.

Mining attacks as described may also be aimed at attacking other blockchain networks with which Walmart Prime cooperate, in which case Walmart Prime may lose all their value, and Walmart Prime's ability to properly allocate or provide Services in accordance with the ICO documentation may be disturbed or completely impossible.

The risk of weakness or breakthroughs in use in the field of cryptography, advances in cryptography or technology can pose a risk to cryptocurrencies and Walmart Prime's blockchain technologies. From the technological side, Walmart Prime ensures transaction security through the Blockchain network based on the PoW method, which is much safer than PoS. The cost of network attack using 45% sometimes exceeds the amount you can steal in this way.

A long block verification (maturity coin) allows the Walmart Prime 's team to correct part of the chain in case of a hostile hard fork. Constant monitoring of network, even in case of the attack on Walmart Prime 's Blockchain, will allow for a quick response of the DEV team to protect investors' capital. Walmart Prime strategic portfolios are on so-called 'cold' wallets that are offline.

Regardless of the security measures used, there is no certainty that there will be no theft of cryptocurrencies as a result of a hacking attack, sophisticated cyber-attacks, "DDoS" attacks, errors, vulnerabilities or asset defects. Such cases may include programming errors or source code leading to their use or misuse. In such a situation, Walmart Prime Investment Corporation may not be able to recover the collected cryptocurrencies and may not be able to use these funds to develop the services

7.2 LEGAL RISKS

There is a risk that in some jurisdictions, Walmart Prime may be considered as securities, now or in the future. Walmart Prime Investment Corporation makes no guarantee or assurance that their services are not securities in all jurisdictions. The acquisition of cryptocurrencies, will be thoroughly analyzed by various control authorities around the world, which has so far yielded mixed reactions and legal effects.

Walmart Prime Investment Corporation's legal capacity to provide services in some jurisdictions can be eliminated by future regulations or legal action. In such a case, when it turns out that the Walmart Prime services are not legally permitted in a given jurisdiction, Walmart Prime Investment Corporation may cease operations in that jurisdiction or adjust the Walmart Prime so that they meet the requirements of the new regulations.

Moreover, the functioning of the Walmart Prime network and related blockchains may be disturbed by the queries or actions of control authorities, including limitations in the use or possession of cryptocurrency, which may disturb or limit their existence, slow down or limit their functioning in the future, the permissibility of their use and possession as well as influence their value. In which case Walmart Prime may lose all their value, and Walmart Prime 's ability to properly allocate or provide Services in accordance with the ICO documentation may be disturbed or completely impossible.

7.3 UNFORESEEN RISKS

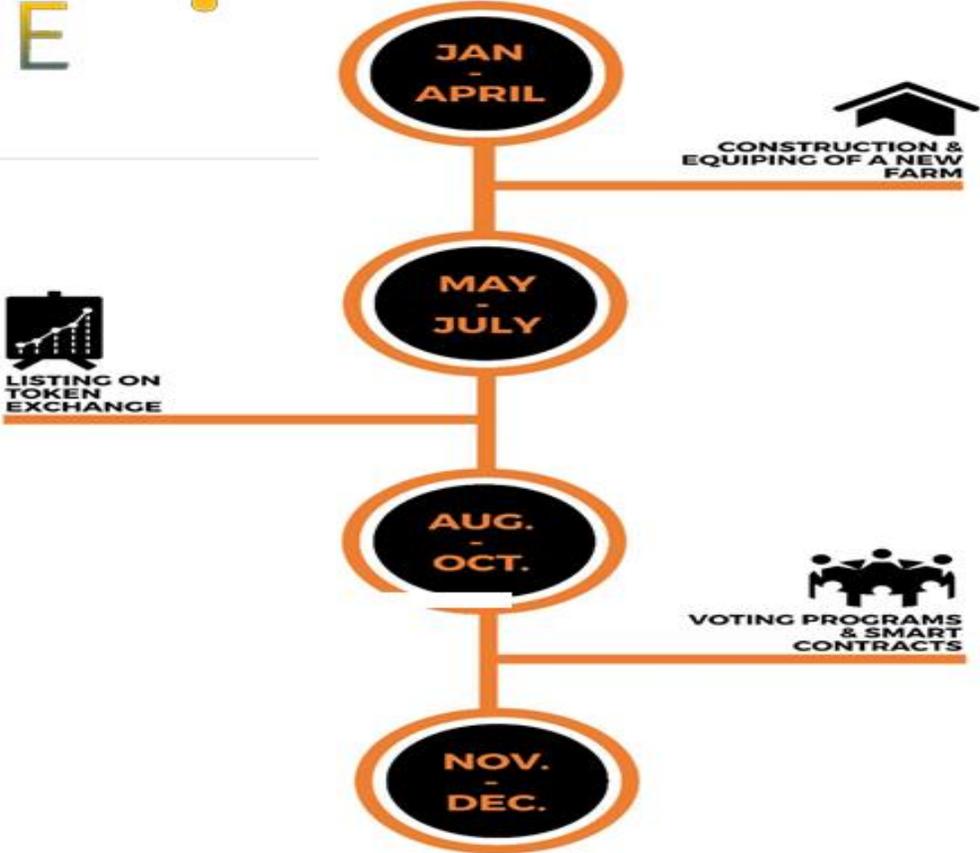

Cryptocurrencies and blockchain technology is a new and untested type of investment. In addition to the risks mentioned above, there are other risks that Walmart Prime Investment Corporation cannot foresee and it is unreasonable to assume that such risks could have been predicted earlier.

In the future, further unforeseen risks may arise.

The Roadmap

Walmart ROADMAP '20

PRIME

APPENDIX

WALMART PRIME

9.1 ABOUT US

Walmart-Prime was made by professionals for individuals who want to get involved in cryptocurrency mining. We believe that everyone should benefit from the mining and be able to have access to the newest technologies and large-scale industrial data centers from your laptop or mobile phone. Walmart Prime is an entity created and operated on mining the decentralized digital ledger by one or multiple human or Autonomous Agent - owners or a mixture of both that share a common purpose and unites in order to focus their various talents and organize their collectively available skills or resources to achieve specific, declared goals by using the most efficient techno-mechanisms required.

The decentralized company owns capital and other, primary digital, assets. It can also collaborate with other partners or businesses inside and outside of the decentralized network – making it a highly versatile entity. Such a company exists as long as it is able to self-update its most basic components and continue being recognized as the same entity or until it decides to terminate its existence.

Started operation of hardwares in late 2016, and with the union of other cryptocurrency mining professionals based in major mining centres across the globe, the company has continuously improved its operations. We share the common goal of advancing the global profile and leadership of the mining and exploratory industry.

Fully incorporated on August, 2016 with the major goal of dealing in crypto-assets and digital monies and with continuous development cycles, we always strive to bring the best possible user experience and security to our customers all around the globe.

Walmart Prime can use Walmart Prime or Walmart-prime with extension for better recognition in forms: Walmart-prime - “.com”, “.trade”
